

# Radiation level map of Koriyama City ( February, 2017 )

Calculated the average level of each section by dividing the city area into sections of 500 m (387 sections) and other areas into sections of 1 km (379 sections) based on the measurement result of radiation on the roads.  
Including the radiation level before the accident (equivalent to 0.04  $\mu$ Sv/h).

- Measurement date: February 13, 2017 to March 9, 2017.
- Measuring instrument: NaI scintillation survey meter TCS-172B manufactured by HITACHI
- Measurement height: Measured at the height of 1 m from the ground at all points.
- Investigation point: On the roads, 1,067 points
- No. of Sections
