

Radiation level map of Koriyama City (February, 2015)

Calculated the average level of each section by dividing the city area into sections of 500 m (386sections) and other areas into sections of 1 km (377 sections) based on the measurement result of radiation on the roads.
Including the radiation level before the accident (equivalent to 0.04 μ Sv/h).

- Measurement date: January 27, 2015 to February 16, 2015.
- Measuring instrument: NaI scintillation survey meter TCS-172B manufactured by ALOKA
- Measurement height: Measured at the height of 1 m from the ground at all points.
- Investigation point: On the roads, 1,064 points
- No. of Sections
