

Radiation level map of Koriyama City (The 2nd Measurement of 2018)

Calculated the average level of each section by dividing the city area into sections of 1 km and other areas into sections of 2 km based on the measurement result of radiation.

• Measurement date

November 5, 2018 to December 13, 2018.

• Measuring instrument

NaI scintillation survey meter
TCS- 172B manufactured by HITACHI

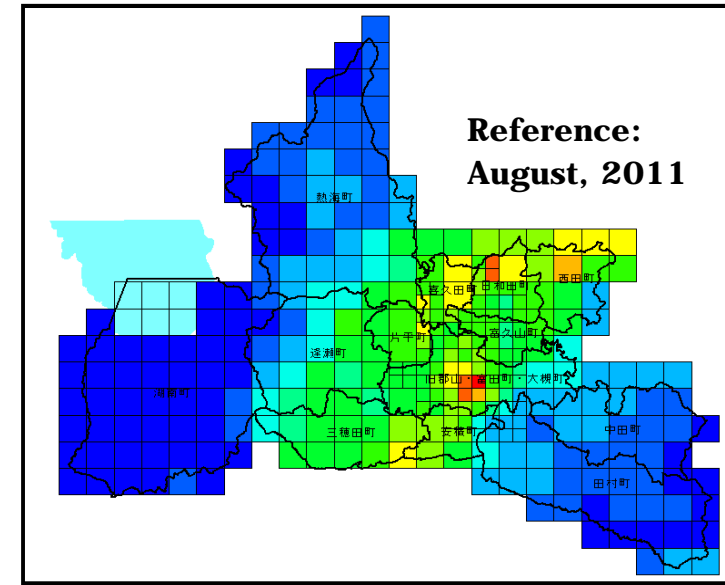

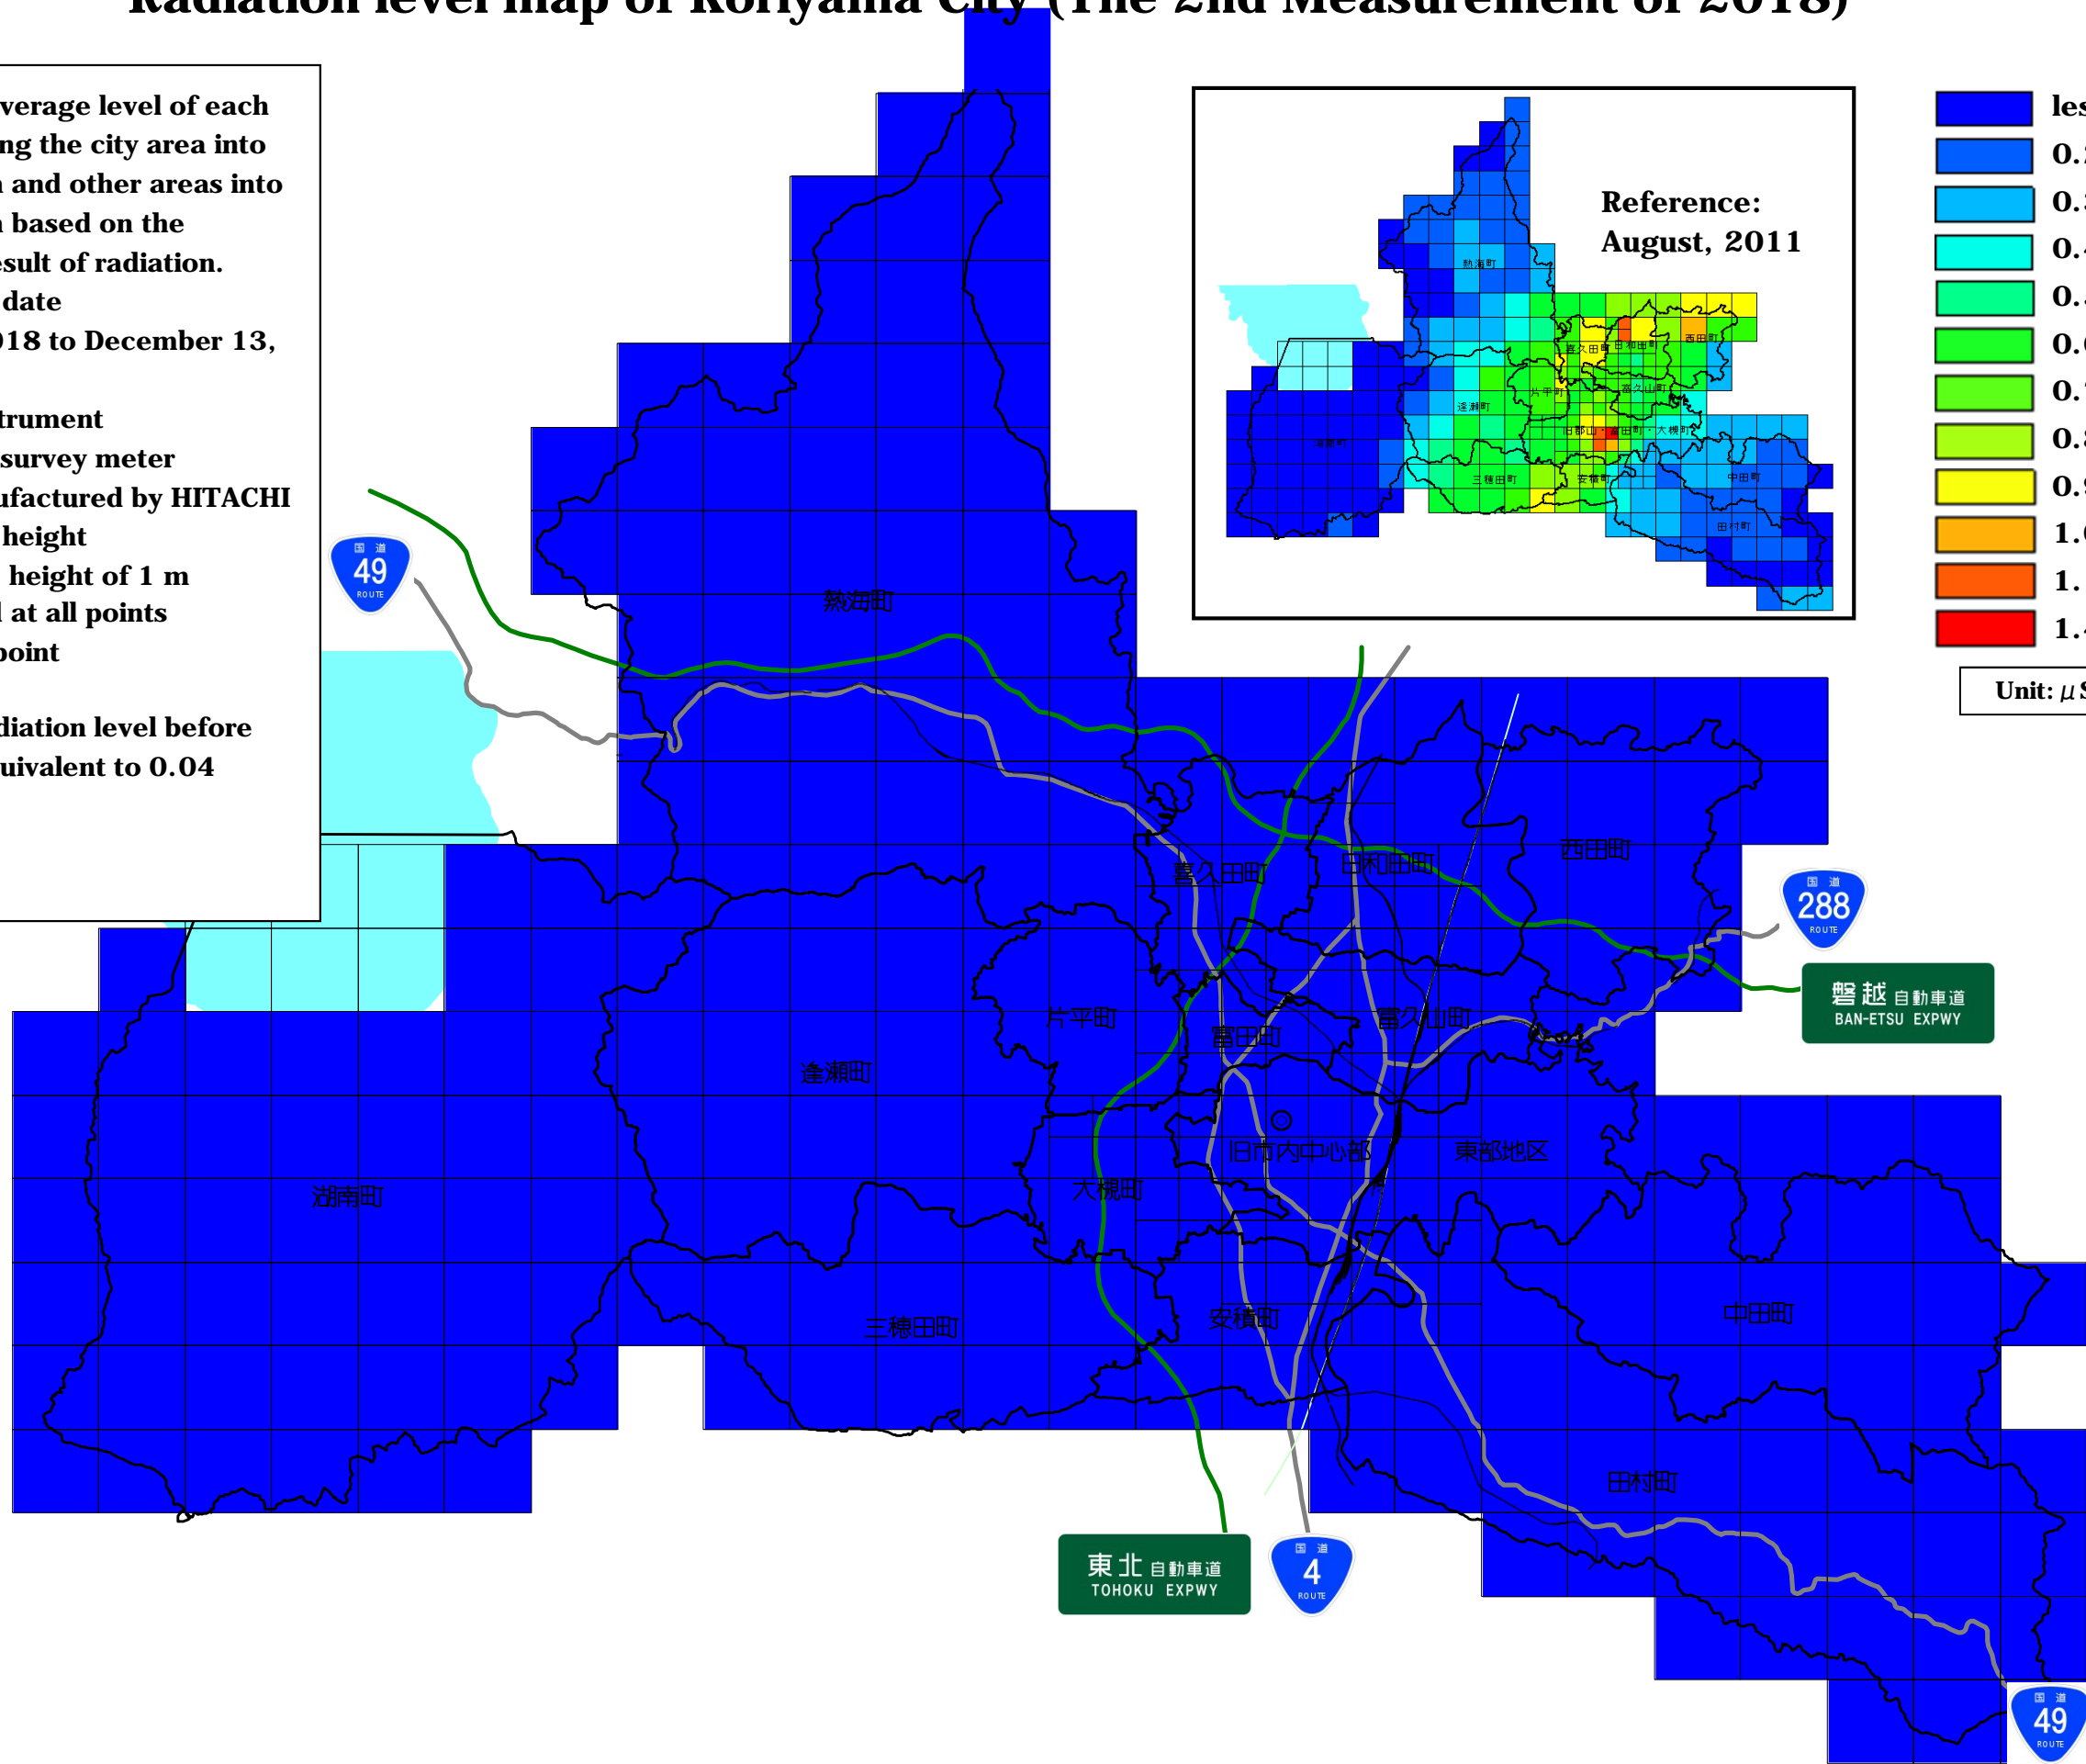

• Measurement height

Measured at the height of 1 m
from the ground at all points

• Investigation point

2,500 points

Including the radiation level before
the accident (equivalent to 0.04
 $\mu\text{Sv/h}$).

Reference:
August, 2011

Unit: $\mu\text{Sv/h}$
