

# Radiation level map of Koriyama City (December, 2015)

Calculated the average level of each section by dividing the city area into sections of 1 km and other areas into sections of 2 km based on the measurement result of radiation on the roads.

- Measurement date

December 4, 2015 to December 24, 2015.

- Measuring instrument

NaI scintillation survey meter TCS-172B manufactured by ALOKA

- Measurement height

Measured at the height of 1 m from the ground at all points

- Investigation point

On the roads, 1,077 points  
Including the radiation level before the accident (equivalent to 0.04)
