

Radiation level map of Koriyama City (September, 2014)

Calculated the average level of each section by dividing the city area into sections of 1 km and other areas into sections of 2 km based on the measurement result of radiation on the roads.

- Measurement date
August 21, 2014 to September 4, 2014.
- Measuring instrument
NaI scintillation survey meter TCS-172B manufactured by ALOKA
- Measurement height
Measured at the height of 1 m from the ground at all points
- Investigation point
On the roads, 1,077 points
Including the radiation level before the accident (equivalent to 0.04 $\mu\text{Sv/h}$).
