

# Radiation level map of Koriyama City (September, 2013)

Calculated the average level of each section by dividing the city area into sections of 1 km and other areas into sections of 2 km based on the measurement result of radiation on the roads.

- Measurement date  
September 3, 2013 to September 20, 2013.
- Measuring instrument  
NaI scintillation survey meter TCS-172B manufactured by ALOKA
- Measurement height  
Measured at the height of 1 m from the ground at all points
- Investigation point  
On the roads, 1,076 points  
Including the radiation level before the accident (equivalent to 0.04

|                |
