

Radiation level map of Koriyama City (Measurement of 2022)

Calculated the average level of each section by dividing the city area into sections of 1 km and other areas into sections of 2 km based on the measurement result of radiation.

- Measurement date
July 20, 2022 to August 27, 2022.
- Measuring instrument
NaI scintillation survey meter
TCS-172B manufactured by HITACHI
- Measurement height
Measured at the height of 1 m from the ground at all points
- Investigation point
1,000 points
Including the radiation level before the accident (equivalent to 0.04 $\mu\text{Sv/h}$).
